HINI: SWINE FLU

Parents: Yesterday a letter was sent home regarding information on the Swine Flu from the CDC. It is also attached here for your review. We will send more info as it becomes available.

Proper hand hygiene:

There's a right way and useless way to wash hands and wash away micro-organisms. The object is to break down the protective membranes of germs, dislodge them from your hands and let them go down the drain. Plain soap in the right hands is strong stuff.

*Lather well with a bar of soap or squirt a coin size of liquid soap in the palm of your hand.

*Vigorously rub your hands together, soap up between your fingers, AND your wrists, front and back for 15 seconds. Sing the first chorus of any song you know and that'll take you through the 15 seconds.

·Rinse under warm, RUNNING water. Remember, the object is to dislodge

germs. The force of water is key.

·Thoroughly dry your hands with a disposable towel or under the blower, again, rubbing your hands together.

·Discard the towel.

If you're using alcohol-based gels as hand cleansers:

Put a dime-sized amount in one hand:

·Vigorously rub your hands together and in between your fingers until the GEL IS DRY about 30 seconds.
·DO NOT touch your face!
Once your hands are clean, do not touch your face, nose, eyes or lips. Rubbing your eyes and nose provides a freeway for micro-organisms and good breeding ground once they've arrived.
Cover your cough: If you must cough or sneeze, cover your mouth with a tissue, your sleeve or your hand. Throw the tissue away in a waste basket. Do not leave discarded tissues on your desk or other surfaces. Then, wash your hands thoroughly.
